

A Checklist of Flora for the Canning & Kongakut Rivers

This list includes records for the Canning & Kongakut rivers from the Consortium of Pacific Northwest Herbaria (CPNWH) and Hulten's 1968 *Flora of Alaska and Neighboring Territories*. It is sorted by scientific names consistent with the 2020 Flora of Alaska Project, updated from Hulten. A few lichens, mosses, and fungi are included after vascular plants. An 'x' indicates plants observed by Dennis Ronsse.

A field guide with photos and field ID notes for common plants of the area is available at the Alaska Native Plant Society website: <https://aknps.org> along with a booklet of general information about these rivers.

AKNPS is a non-profit organization founded in 1982 to promote awareness, education and preservation of Alaska native flora.
