

A Checklist of Flora for the Sadlerochit Mountains

This list includes records for the Sadlerochit Mountains from the Consortium of Pacific Northwest Herbaria (CPNWH) and Hulten's 1968 *Flora of Alaska and Neighboring Territories*. Plants are sorted by scientific names consistent with the 2020 Flora of AK Project, updated from Hulten's flora. A few lichens, mosses, and fungi are included after vascular plants. An 'x' indicates specimens collected by Dennis Ronsse in June 2021, held at UAA and UAF annotated by Carolyn Parker, and 'xx' is for plants observed, but not collected.

A field guide with photos and field ID notes for common plants of the Sadlerochits, along with a booklet of general information, is available at the Alaska Native Plant Society website: <https://aknps.org>.

The Alaska Native Plant Society is a non-profit organization founded in 1982 to promote awareness, education and preservation of Alaska native flora.
